

An Eldon James Company

Eliminate PVC from your draught system. Here's why...

EJ Beverage has developed a PVC FREE tubing that has proven to be an excellent alternative to PVC. The properties of EJ Beverage line of tubing includes medical grade materials, high flexibility, extremely low permeability and 100% organic emissions when burned or incinerated. Great for home brewers, accidents do happen.

- The EJ Beverage line of tubing has superior barrier properties preventing cross contamination of flavor and aroma (see figure 1)
- Ultra-low extractable/leachable assure product quality and taste. EJ Beverage unlike PVC has no odor. PVC's shower curtain smell effects the taste of any beverage.
- Environmentally friendly manufacturing.

Figure 1 - Barrier Properties for Oxygen Permeation

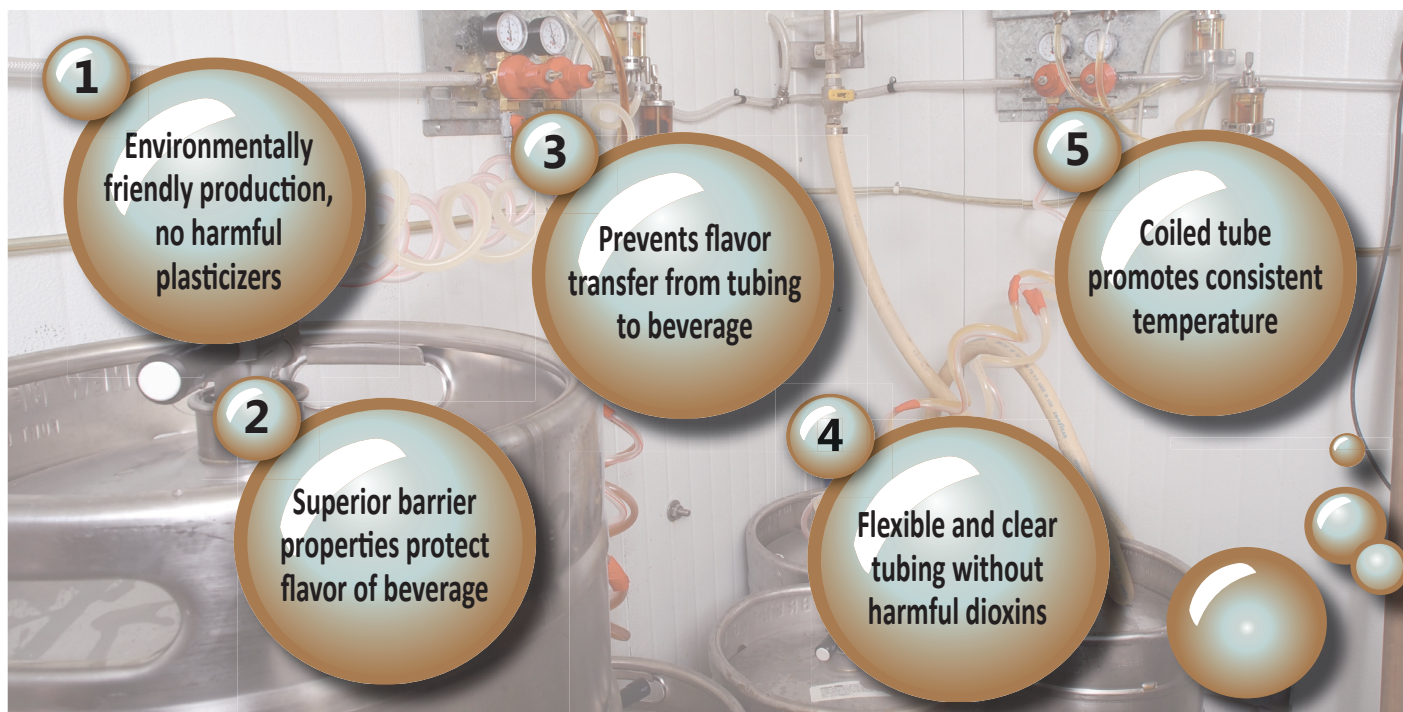

*Comparative Test - ASTM F-1307

5 distinct advantages of PVC FREE tubing for draught beer applications

With millions of feet of tubing produced every year for draught beer applications, these are key advantages to installing EJ Beverage PVC FREE alternative:
